

## **British Alpaca Futurity 2007 Trade Stand Shell Scheme Description**

Octanorm is undoubtedly the premier display and exhibition shell system, having proved itself in a wide variety of formats and countless venues throughout the world. At every major conference and exhibition where enterprise, industry and commerce come together; the Octanorm system provides the backdrop for their displays and their discussions.

The clean design and discreet presentation lends itself equally to the most sophisticated and the simplest of displays. Whether catering for a local craft fair or a multinational conference, Octanorm is a truly versatile system, suitable for all exhibition and display purposes. The polished aluminium uprights and horizontal beam profiles lock together to create a solid structure that provides a quality surrounding for any exhibition. All exhibition stands are installed complete with matching or contrasting fascia panels and customised identity name boards.

As well as providing a conference backdrop, Octanorm can also be used to create temporary offices or screening. The versatile flexibility of the system enables it to be applied to build such items as reception desks or simple poster panels.

Wall panels are supplied in white PVC; standard grey weave (velcro compatible) fabric; or in a variety of alternative colours. All materials meet the class 1 flame proofing requirements. A full range of compatible accessories is available, including shelving, leaflet holders, lockable cupboards, counter units, carpeting, lighting and power sockets.

Each Stand will be 3 m x 3m wide and 2.47m high. For further information on lighting or furniture packages please contact Denbe Displays Ltd telephone 02920 223446; www. Denbe.co. uk. Please mention the British Alpaca Futurity at Newbury Race Course in all enquiries.
